About Kala Pharmaceuticals, Inc.

Kala is a commercial-stage biopharmaceutical company focused on the discovery, development, and commercialization of innovative therapies for diseases of the eye. Kala has applied its AMPPLIFY[®] mucus-penetrating particle (MPP) Drug Delivery Technology to two ocular therapies, EYSUVIS[®] (loteprednol etabonate ophthalmic suspension) 0.25% and INVELTYS[®] (loteprednol etabonate ophthalmic suspension) 1%. On May 23, 2022, the Company announced that it entered into a definitive agreement to sell its commercial portfolio and related intellectual property assets to Alcon Inc. The Company anticipates the transaction will close in the third quarter of 2022, subject to certain conditions, including the expiration of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act and other customary closing conditions. The Company also has a pipeline of development programs including a clinical-stage secretome product candidate, KPI-012, initially targeting persistent corneal epithelial defects (PCED) and multiple proprietary new chemical entity (NCE) preclinical development programs targeted to address unmet medical needs, including both front and back of the eye diseases.
